

Universal charge controller EAC

All-rounders with self-learn effect.

The EAC 4 is suitable for the reverse, spread and forward control operating modes. It regulates the charging of the storage heaters centrally and in accordance with demand, subject to the outside temperature and the residual heat inside the device. It is equipped with a weather sensor and can be used in all charger models for these storage heaters. The control voltage is 230 V. In addition, the unit is equipped with a simple menu guide and an automatic learning facility to accommodate the relevant charger model.

The most important features

May be used with all storage heater conditions

Particularly easy adjustment

Only the time and charger model need to be entered

Sensors by third party manufacturers can be connected

Control voltage system (analog) adjustable from 30-100 % OD

80 % OD system, digital

Adjustable setback heating

Type	
Type	EAC 4
Part no.	187900
Specification	
Version	{Universalsteuerung}
Control output	300 W
ON duration (OD) system	30-100 %
Type of display	LCD
Height	90 mm
Width	107 mm
Depth	55 mm
Rated voltage	230 V
