

RTA 3600 UP

Integration made easy.

With a breaking capacity of 4 000 W, several individual natural stone heaters can be connected to this controller to centrally regulate even larger rooms. The powerful RTA-3600 UP is fitted with a separate ON/OFF switch and offers the option of an additional temperature setback via an external switch or time switch. That way, energy and associated costs can be saved at times of low heat demand. The room temperature can be variably selected between 5 °C and 30 °C. The RTA -3600 UP is equipped with a thermal feedback and ensures a constant room temperature thanks to its narrow switching differential of +/- 0.5 K.

The most important features

Optional integration into underfloor heating system programs

Breaking capacity ~ 16 (4) A, 250 V

Temperature setback of approx. 4 K possible via external switch/time switch

Temperature range restriction in the rotary selector

Type	
Type	RTA 3600 UP
Part no.	223343
Height	80,50 mm
Width	80,50 mm
Depth	43,50 mm
